SHOP INDUSTRIAL INFRARED HEATERS - ARGN

OOO Led Technology and Dankon offer shop industrial infrared heaters ARGN. Heaters, infrared, industrial-Guild Sunrain is designed for basic and additional heating of public and administrative and residential buildings as well as for heating of inhabited premises not designed for domestic use such as shops production halls warehouses sports facilities at industrial plants and agricultural facilities with a ceiling height of not less than 35 m.

Heaters, infrared, industrial-shop floor heat not the air but the surfaces and objects in its range that is half of the wall and the people themselves. In this method of heat transfer heating costs are greatly reduced as there is an optimal temperature distribution as well as the General decrease in average temperature without loss of comfort.

Shop industrial infrared electric heaters are available in three models, 1000 1500 and 2000 watts. Heaters are installed on the ceiling without taking up wall space and freeing up additional space.

Design-engineering group was performed better heat-transfer properties of the heating panels industrial infrared shop heaters. Through the use of the front side panel high temperature paint and to increase the ratio of black covering of the panels significantly increased the heat-transfer properties of the heaters.

HEATERS ARGN Sunrain HAVE the CERTIFICATE of CONFORMITY № ROSS RU 7049016.AA08.In 02256

SANITARY-EPIDEMIOLOGICAL CONCLUSION № 24.49.30.344.P.000866.12.07

The products are patented.

The main advantages of industrial infrared electric heaters ARGN

-Reflector is made of anodized aluminum

-Is not afraid of corrosion. The heater is made of stainless steel AISA 430.

-Terminal box suggests the possibility of Daisy-chaining multiple devices.
